GC-I³ Young Academy - Paper of the Year 2024

Instructions for posters

During the GC-I³ Young Academy - Paper of the Year 2024 event on the 22nd of May, we will hold a poster session in the foyer of H7 from 11:00 – 12:00 and award three poster prizes (1., 2., 3. place). **The poster presentations will be judged by each participant.**

The following table includes suggestions on how to evaluate a poster as well as to design your own.

1	**Structure:** - poster is well structured and self-explanatory (stands for itself)
2	**Appearance:** - text, figures and space are well balanced with figures playing a dominant role in communicating the project - text is easy to understand (spelling and grammar) - all elements are well visible (font and figure size) and labelled
3	**Scientific content:** - scientific rationale and aims of the project are sound - scientific content is valid (appropriate methods, conclusions supported by data etc.)
4	**Delivery and discussion:** - the story was understandably delivered - presenter used her/his time efficiently - presenter was able to answer questions and engage in discussion

Technical instructions for preparing your poster

- The poster boards have a format of 1,50 m x 1,20 m (upright format), any format fitting on those boards and fulfilling the criteria stated above is allowed.
- Existing posters may be re-used.
- If you want to prepare a new poster, you can use the templates provided by the Medical Faculty: http://www.cdmed.ovgu.de/home/Wissenschaftsposter.html
- Please also include the logo of the GC-I³:
- We suggest including the usual elements (rationale, hypothesis, data, conclusion, future plans). However, you are free in the weighting of these elements. This means that also projects which are still at an very early stage can and should be presented!
